

What can I do with a major in Anthropology?

Anthropology is most simply defined as the study of humans, in all of our wondrous similarities and differences. It is a field that explores the important question of what makes us human by studying our unique biology and our diverse societies and cultures.

Anthropology helps students to understand and value human diversity, to develop an appreciation for their local context, as well as a global awareness, and to embrace an interdisciplinary perspective by drawing on both the natural and social sciences and the humanities.

Skills developed in this major:

- Critical thinking and reasoning
- Written and verbal communication
- Social perceptiveness
- Team work

Recent internship sites for this major:

- City-County Bureau of Identification
- Duke Lemur Center
- Office of State Archeology
- William Peace University Field School
- North Carolina Council for Women

Recent places of employment of Anthropology majors:

- NC Department of Health and Human Services
- North Carolina Department of Transportation
- N.C. Division of Disability and Determination Services
- City of Raleigh, Parks and Recreation
- Halifax County, Department of Social Services

Recent graduate school acceptances:

- Liberty University, School of Business
- North Carolina State University, M.A. Anthropology
- North Carolina State University, Biological Anthropology
- East Carolina University, M.A. Anthropology

What can I do with a major in Leadership and Nonprofit Administration?

Become a change agent and leader in all aspects of life, whether that's personally or professionally. Through the Bachelor of Science in Leadership and Nonprofit Administration, you'll learn the skills needed to impact your place of business and your community. You will also learn how to lead and manage nonprofit organizations through an internship, experiential learning and exposure to nonprofit environments and professionals in the field. Our blend of traditional business courses, mixed with a focus on organizational development, ethical principles, and serving your community, will help you develop the knowledge and skills needed to enhance your leadership potential in the nonprofit or civic arenas.

Highlights from the program:

- A **mentoring** program built into our Leadership course. This program is offered in conjunction with **Leadership Triangle**.
- Immersive learning experiences with local nonprofits.
- A social entrepreneurship project built into our capstone course
- Annual **Career Fair** on campus to explore internships and full time positions in nonprofit organizations

Skills developed:

- Managerial abilities related to organizations
- Leadership techniques
- Facilitation of groups
- Social research and methodology
- Business acumen for nonprofit organizations

Potential internship sites and employment:

Students should choose an internship site at a local or national nonprofit organization that relates to a passion or career interest in areas such as: health, arts, education, environment, social justice, public policy, or animal welfare, as examples.

- Wake Education Partnership
- Museum of Natural Science
- Autism Society
- Boys and Girls Clubs
- State Employees Credit Union
- Blue Cross and Blue Shield of North Carolinas

What can I do with a major in Biology?

Students majoring in Biology have the option of pursuing a Bachelor of Arts degree or the more science and math-oriented Bachelor of Science. Either route exposes students to in-depth study of biological sciences with an emphasis on preparation to enter a host of careers.

A Biology major can be focused on pre-med, pre-veterinary, pre-dental, or nursing options. In addition, an Allied Health track opens numerous other options for students majoring in Biology, including health administration, medical technology, physical therapy, or speech and language pathology. Whether your interest is in graduate work or a professional program directly after graduation or moving straight into the workplace, the Biology major will ground you in scientific studies and prepare you to be a successful scientist in the 21st century world.

Skills developed in this major:

- Critical thinking and reasoning
- Complex problem-solving
- Laboratory analysis
- Research methods
- Written and verbal communication

What can I do with a major in Criminal Justice?

Criminal Justice Program consists of inter-disciplinary courses that will help you understand the conditions—psychological and sociological—that lead to criminal behavior. You will also develop a strong understanding of the legal system in the United States, as well as develop skills that you can use once you graduate.

The program at William Peace will help you become a leader in the criminal justice field as you prepare for a career after college—whether the career is in law enforcement, Homeland Security, or justice administration. An internship will give you hands-on experience working with professionals in areas related to criminal justice. When you graduate, you will be well prepared to pursue a criminal justice career because of your internship experience.

Skills developed:

- Critical Thinking
- Problem Solving
- Social Perceptiveness
- Judgment and decision making

What can I do with a major in Education?

Whatever else happens in the world, there will always be a need for well-prepared, committed classroom teachers. Education majors at Peace are exposed to a blend of theoretical and philosophical knowledge, alongside practicum and student teaching experiences that prepare them for their own classrooms. A close and vital partnership with the Wake County Public School System, the second largest school system in North Carolina, enhances the experiential opportunities of Education majors.

Students may choose to pursue licensure in Elementary Education (K-6), Special Education: General Curriculum (K-12), or a blended program of both. In addition, majors will soon have the option to pursue Middle School licensure, with a math concentration. Whatever path an Education major takes, he/she is part of a collaborative model of teaching and learning in a program that focuses on ensuring the achievement of 21st century knowledge, skills, and dispositions for all of its graduates.

What can I do with a major in Environmental Studies?

Environmental Studies is an interdisciplinary program that provides an overview of the scientific, economic, cultural, and policy elements of the environment and the issues touching it. The EVS major draws on both liberal arts and pre-professional disciplines, including Biology, Chemistry, Anthropology, Political Science, Business Administration, Global Studies, and Communication.

According to the U.S. Bureau of Labor Statistics, approximately 10% of new jobs by 2033 will be “green” careers. Examples of these new careers include the following: environmental safety specialist, environmental coordinator or planner or permitting specialist, risk assessor, greenways coordinator, nature preserve manager, carbon broker, protection technician, sustainability coordinator, environmental educator, ecotour guide, lobbyist, and many more.

According to Peterson's, "Environmental Studies graduates can expect to find careers as environmental planners, analysts and policy-makers. Of course, you can also work for a corporation, managing their compliance with environmental regulations and conducting audits of internal environmental efficiency (EE). Graduates can also work in the conservation or public sector managing or protecting natural resources. The degree is also a good starting point for an advanced degree."

What can I do with a major in Theatre?

The Theater Arts program is designed for the theater student to study all aspects of the theatrical world. Theatre students learn to perform, design, research, analyze, create and work collaboratively with other students and local professional artists. Upon completion of their degree, students can continue to work in their field of study or seek a graduate degree in design, directing, performance, theatre education and non-profit management to name a few.

Students audition and perform in a variety of productions annually and have the opportunity to audition and perform for area community theatres. Our students have had parts in productions with the NC Theater, Burning Coal Theater, Justice Theater Project and Theater in the Park.

Skills developed:

- Artistic expression
- Critical thinking
- Social perceptiveness
- Public speaking

- The Juilliard School
- Virginia Commonwealth University
- AMDA
- UCLA

WILLIAM PEACE
UNIVERSITY
Your Success. Our Mission.

Connecting Students and Alumni with Opportunities

What can I do with a major in Theatre Education?

William Peace University's BA in Theatre Education program is the only one of its kind in the Raleigh area. You will study acting, history, technical theatre, education, English and psychology under faculty with lengthy professional, artistic and academic credentials. In addition, valuable outside-the-classroom experiences include required theatre internships, participation in student-run organizations, study abroad opportunities and the annual senior trip to NYC to take part in professional auditions. Whether your post-graduation plans include graduate school or professional theatre, you will develop the tools, skills and connections you need to succeed.

Skills developed in this major:

- Artistic expression
- Critical thinking
- Social perceptiveness
- Public speaking
- Complex problem solving
- Critical thinking and reasoning
- Interpersonal relationship building

Your Success. Our Mission.

Connecting Students and Alumni with Opportunities

What can I do with a major in Writing?

Even in the increasingly technological and often mechanized workplace, employers continue to identify mastery of language as the skill most lacking in recent college graduates.

A 2013 report written by *The Chronicle* and American Public Media's Marketplace claimed that "written and oral communication skills" was identified by more than 700 employers as the leading skill deficit among graduates. The Writing major combines a focus on close reading and argument with a contemporary application of such skills to digital media to prepare graduates for careers in emerging fields that demand linguistic precision in technological contexts.

The Writing curriculum combines courses from the English and Communication programs to produce graduates who are skilled at creating rhetorically sophisticated documents and prepared to put them to immediate practical use in high-tech companies.
